

Dolby® CaptiView

DELIVER A BETTER EXPERIENCE

Dolby® CaptiView is a personal in-theatre closed captioning system for hearing-impaired movie audiences. It transmits and receives closed captions on a wireless frequency. A single USB transmitter plugs into the server to create a no-hassle installation, and it requires no additional booth hardware. With an 80-meter (242 feet) signal, Dolby CaptiView can be used from any seat in the house.

The Dolby CaptiView viewing device consists of a small OLED display on a bendable support arm that fits into a theatre seat cup holder. The easy-to-read screen is equipped with a rechargeable lithium-ion battery that lasts up to 16 hours per charge. The high-contrast display comes with a privacy visor so it can be positioned directly in front of the movie patron with minimal distraction to neighboring patrons.

Dolby CaptiView is economically priced to allow the cinema owner to outfit one hundred percent of the multiplex and can support up to six languages simultaneously.

DOLBY CAPTIVIEW KEY FEATURES

- The Dolby CaptiView system transmits and receives closed captions on a wireless band frequency.
- With an 80-meter (242 feet) signal range, Dolby CaptiView can be used from any seat in the house.
- A rechargeable OLED display lasts up to 16 hours per charge.
