

Dolby® Fidelio

DELIVER A BETTER EXPERIENCE

Dolby® Fidelio is a wireless audio system that delivers descriptive narration for the visually impaired (VI soundtrack) and amplified sound for the hearing impaired (HI soundtrack) in theatres. The system consists of a compact audio receiver with a plug-in headset, an audio transmitter that connects to any server via audio and USB connections, and a charging station that accommodates 10 receivers. Auditorium and channel (VI or HI) assignment can be easily configured from the touch-screen tablet.

DOLBY FIDELIO KEY FEATURES

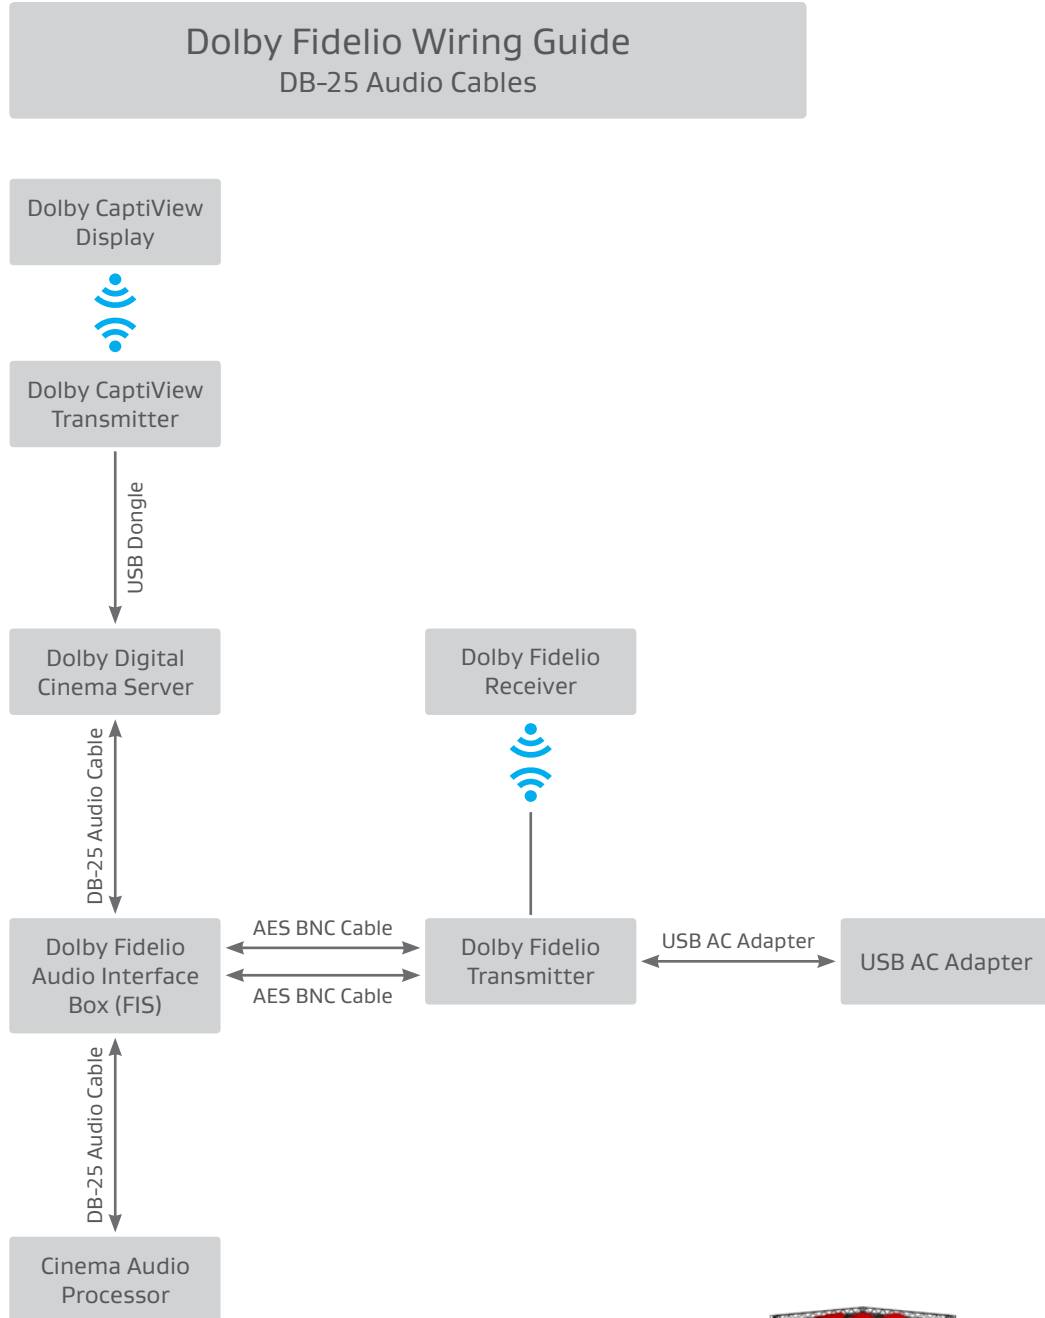

- Compact audio receiver
- Audio receiver provides a standard 3.5 mm headphone jack
- Audio transmitter connects to Dolby digital cinema servers* via audio cable and USB connection
- Charging station for 10 receiver units
- Configure the auditorium and channel (HI or VI) assignment through a touch-screen tablet

* Excluding legacy Dolby DSP/DSS servers
